CONTACTS

www.masaqatar.com

Dear Business Partners;

MASA takes immense pleasure in introducing itself as 10 years old company who continues the tradition of providing new and past clientele with service, quality, and schedules that meet or exceed the diverse and varying requirements of our clients' expectations.

MASA specialized company for the Access and Lifting Equipment of the Construction sector with high ability to offer the best rates with greater values and never compromising our commitment to quality and service.

The most fundamental part of MASA is our employees. Our people care about job quality. They take the extra step to ensure correctness of work. It is MASA goal, as well as the goal of our employees, to give our customers the best job possible.

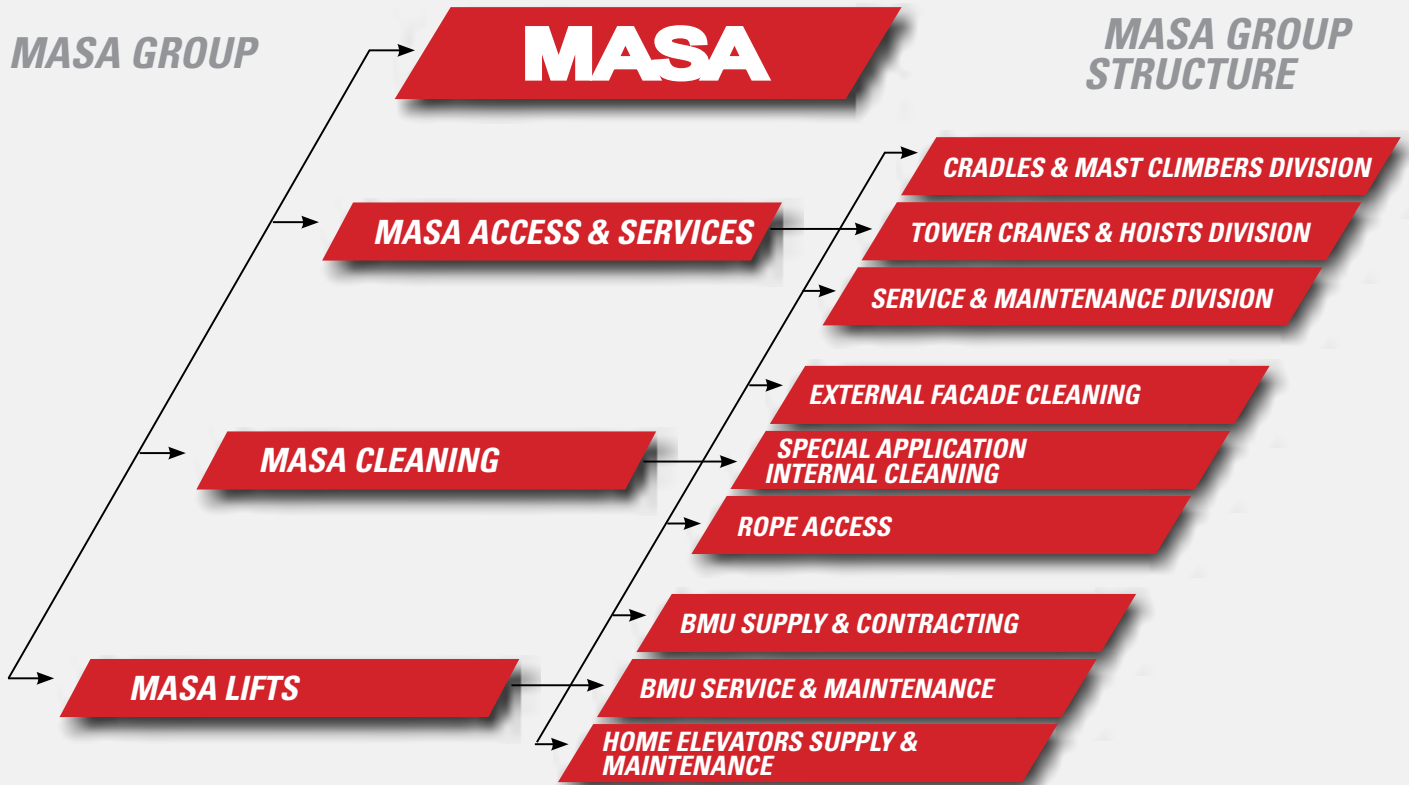

No matter the complexity, location or budget of your project, MASA can provide you with personalized service, reliability, and quality your company deserves.

We invite you to contact our following MASA Group Subsidiaries with any requests or questions you may have.

MASA looks forward to serve your company being part of your team and engineer your estimates and would sincerely appreciate an opportunity to work with you on your future projects where our services would be of value.

Kindest Regards

Mr. HAZZA NASSER AL-HAJRI
CHAIRMAN

PASSENGER HOISTS

The general building hoist manufactured by our company have the features as good quality, long life, wide application range and convenient for maintenance. The gearing adopts imported bearing, enameled cable, and oil seal. The electric parts adopt products from world renowned manufactures such as Schneider, Siemens and LG. The racks and pinion adopts special material and heat-treatment technique, which prolong the life of these parts. The steel structure uses quality steel from famous domestic manufactures. The surface of the structure can apply paint-spray, parkerizing baking finis or hot galvanizing processing according to users requirements. The cage can be produced and decorated by steel knitted mesh, aluminum molded board, punched plate or figured aluminum board.

BUILDING MAINTENANCE UNIT - BMU

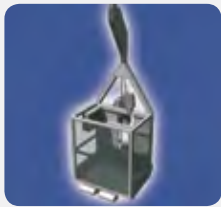

WAHLEFELD

Every Wahlefeld BMU is unique in design and supports maintenance and repair of high quality wall cladding by using modern technology. By using our BMU-equipment all defined elevations of the building incl. an atrium can be reached.

Long lasting experience as well as technical innovations is used under consideration of legal standards for design and fabrication of BMU-equipment.

Permanent development generated a product line, which complies with customer's requirements for product efficiency, safety and appearance. In addition we apply a high standard of anti-corrosion protection: hot dip galvanizing is our standard and the best shield against corrosion

TYPE K1

1-man platform incl. twin rope capstan winch, for monorailsystem or roof car.

TYPE A10

1- or 2-man platform, roof car - central jib with rotatable cross tie - to align platform at elevation.

TYPE A30 / A35

2-man platform - central jib - rigid or luffable-rotatable cross tie - to align platform at elevation.

TYPE A60

2-man platform - crane type roof car - central jib with rotatable cross tie - to align platform at elevation.

GANTRY SYSTEM

Wahlefeld company has long-lasting experience and know how in designing and manufacturing exterior building maintenance systems and related equipment as well as construction of apparatuses.

All BMU's are made in Germany and assembled on basis of a modular system to match optimal the facade's form; applying this system BMU's are delivered within reasonable lead time.

BMU - BUILDING MAINTENANCE UNIT

SPECIAL PROJECTS

There are local situations on site, where modifications for a BMU are required: We create your special BMU suiting to your local situation; our long lasting experience enables us to accommodate to various needs - technically, architecturally, ergonomically.

THE FAÇADE

The facade is the face of architecture. It determines a building's character and, at the same time, provides a protective skin against extreme weather conditions and environmental stress. In order to maintain the facade's quality and function over a long period of time, regular maintenance and servicing are essential.

They save the facade from great damage and dirt accumulation. The facade should keep its expressiveness for years and decades.

CARRIAGE OF WAHLEFELD BMU'S

Wahlefeld BMU's are equipped with three different carriages / wheel gears to meet with different conditions of roof covering.

RESPONSIBILITY

We take care in consulting and planning. Each project is started by checking in detail feasibility concerning engineering and economic efficiency. We feel responsible for each project from design and fabrication till installation. That's one of the reasons why quality is a priority for us.

SERVICE

As a committed and reliable Contractor and Service Provider, the Company is represented by professional multi-national personnel each having high expertise and competencies. Along with the latest technological tools and equipments to embark on and satisfy Client's requirement.
